Saiku

Simple web collaboration
The problem

- Poor team collaboration solutions
- Need to be in touch

pablo@saiku.es

http://www.saiku.es

jueves 23 de abril de 2009
Existing solutions

- Lotus Notes
- Microsoft Sharepoint
- Problem: Release cycles, installed software
- Desktop-only
Could you imagine Facebook’s as a desktop application?
Collaboration 2.0 needs a Web 2.0 approach
Saiku

- Simple web application.
- Manage many projects.
- People’s collaboration, not users.
- Share messages, documents and tasks.

Tasks

Open Source

- Remove all references to prosaiku.com
- Write setup tasks
- Option to choose local or S3 storage
- Make sure configuration is generic

Next actions

- Add locales to relative dates (“one day ago…”)
- Replace dates and times for l.8n strings
- No AJAX verification for confirm password on signup
- Bug: Primers should be per-user, not per-project
- Allow dragging items between lists
- Autodetect locale from browser
- Refactor for locales where possible
- Update production db to strip out bad textile
- Accept attachments from emails
- Bounce emails from email.rb if sender is not in the project
